

Bin Tipper

Designed for heavy use

Bin Tipper

MMC FIRST PROCESS Bin Tipper is designed for heavy use and to withstand rough handling! It is manufactured in stainless steel and is electrically operated. No hydraulics are required.

Big lifting capacity: approx. 1,500kg

Bin Tipper can be delivered with the lifting height tailored to the customer's needs.

Can handle most of the bin/tub sizes on the market.

Can be delivered with a light grid to enable safe operation, when physical barriers are not desirable or possible.

Adjustable tilt angle. The position of the sensor at the top of the tower can be varied to give tilt angles from the standard 25 degrees up to 32 degrees.

PROPERTIES

- Heavy duty design
- Big lifting capacity: approx. 1500kg
- Made of stainless steel

ADVANTAGES

- Electrically driven, no need for hydraulics
- Handles most of the bin/tub sizes on the market.
- Lifting height tailored to the customer's needs.

VALUE

- Affordable solution
- Easy to operate
