

X and T Connections

To guide living fish through our systems, we use specially made Xs and Ts to ensure gentle handling and lowering the fish stress-level. We have a wide size range of this, both in PE and stainless steel.

MMC First Process X and T Connections

The MMC First Process X and T come in different sizes and are made from AISI 316 stainless steel or PE-Plastic. As a standard these come with DN flanges but can be custom made to fit other flange standards.

MMC First Process X	Flange type	Flange T	Material
DN250	DN	12	AISI316
DN300	DN	12	AISI316
DN350	DN	12	AISI316
DN400	DN	12	AISI316 and PE
DN450	DN	12	AISI316
DN500	DN	12	AISI316 and PE
DN600	DN	12	AISI316

MMC First Process T	Flange type	Flange T	Material
DN250	DN	12	AISI316
DN300	DN	12	AISI316
DN350	DN	12	AISI316
DN400	DN	12	AISI316 and PE
DN450	DN	12	AISI316
DN500	DN	12	AISI316 and PE
DN600	DN	12	AISI316

MMC First Process has years of experience as a supplier of fish handling systems, that has both fish welfare and sustainability as its main focus. Transport and movement of fish in a gentle and humane fashion, ensures both enhanced fish welfare and high quality of the product that reaches the market.

The company has a wide range of products, ranging from specialized pumps, graders, water treatment systems, RSW systems, through to washing systems, packing lines and more.

*We truly are a **total** supplier for fish handling.*

- Material AISI 316 or PE-Plastic
- Loose flange for easy adapting
- Smooth design
