

Grinder M62

A high capacity and easy to maintain grinder

Grinder M62

MMC FIRST PROCESS Grinder M62 is a workhorse of a grinder! It is built in stainless steel with knives made of super strong Hardox 450 material.

The grinder was developed with high priority given to ease of maintenance and servicing. The frame is flanged, so it is easy to remove the top frame and gain access to the knife package. The grinder has only one motor and gear, making it easy to install the grinder in tight spots.

The M62 Grinder is developed primarily for grinding fish of all kinds. Its capacity is impressive; up to 13tonnes/hour (depending product type and size).

PROPERTIES

- Robust design
- Product in stainless steel and Hardox 450

ADVANTAGES

- Up to 13 tonnes/hour (depending on product type and size)
- Only one motor and gear
- Easy maintenance
- Can be installed in tight spots

VALUE

- More efficient production of ensilage
- Higher capacity
- Easy to operate
