

Full water chute

MMC First Process full water chute ensures full water level in pipes after grading and counting of fish.

Full water chute

After grading it is necessary to bring the fish back to its right environment. In order to maintain full water level in pipes, MMC First Process has developed a full water chute system, equipped with pumps and pressure transmitters.

Model	Dimensions L*W*H [mm]
DN500	4100*1300*2100

MMC First Process has years of experience as a supplier of fish handling systems, that has both fish welfare and sustainability as its main focus. Transport and movement of fish in a gentle and humane fashion, ensures both enhanced fish welfare and high quality of the product that reaches the market.

The company has a wide range of products, ranging from specialized pumps, graders, water treatment systems, RSW systems, through to washing systems, packing lines and more.

*We truly are a **total** supplier for fish handling.*

- Gentle fish handling
- Easy cleaning
- Ensure full water in pipes
